

unit to believe he died that day. The explosion took Buddy's eyesight, his right leg, and caused brain damage. He refused to allow it to take his spirit.

After years of rehabilitation, Buddy returned to Arkansas with the intention of helping his fellow veterans live happy, productive lives after service. That was the thing about Buddy, he never stopped thinking of others despite the difficult circumstances he found himself in after his own military service.

After earning his master's degree at the University of Arkansas, Buddy went to work for the Blinded Veterans Association, where he served as field representative for 10 years. He later worked as a counseling psychologist and social worker at the VA hospital in Little Rock.

It has been said that he rarely missed a day of work. Helping his fellow veterans was a job he was paid to do until he retired in 2007, but continued to do long after that. That is how dedicated he was to his fellow veterans.

Spivey family members will regale you with stories about Buddy's captivating personality. He was known as a sharp, at times flashy, dresser who wore a suit and tie to work long after business casual became the norm. He was a masterful storyteller, but he also listened to others' stories with the same intensity. After repeat meetings, people were often amazed that Buddy remembered every detail of a person's story from the last time they met.

Most importantly, Buddy inspired people. His sacrifices on the battlefield earned him two Purple Hearts and two Bronze Stars. His sacrifices after service earned him accolades of another sort. The lives he touched, the people he helped, will always remember that sharply dressed man who put others first.●

#### REMEMBERING PAUL RINEBOLD

● Mr. BROWN. Mr. President, I wish to honor Paul Rinebold, a dedicated Ohio dairy farmer, great-grandfather, and community member who passed away last month. Ohio and our Nation are made strong by people like Paul—men and women who have dedicated their lives to their family, community, and work.

A son of Fostoria, OH, Paul lived his entire life in his community. After graduating from Hopewell-Loudon High School in Bascom, OH, he joined the U.S. Army and served his country for 7 years. During that time, in 1959, he married Ardith Bloom of Fremont, OH.

Mr. Rinebold was a self-employed dairy farmer who founded PAR 3 Farms, named after himself, Paul (P), his wife, Ardith (AR), and the first three (3) of what would be their four children. PAR 3 Farms has been recognized by both the Ohio State and the National Ayrshire Breeders Associations for its contributions to the dairy business in Seneca County. Mr. Rinebold's family farm is still in operation today.

In 2008, the Ohio Ayrshire Breeders Association presented Paul with the Ohio Ayrshire Distinguished Service Award, a testament to the care with which Mr. Rinebold raised, treated, and bred his cows. It was at this awards ceremony that the association thanked Paul and Ardith for their dedication and expertise in the field of dairy farming. By 2008, the couple had attended more national Ayrshire conventions than any other Ayrshire dairy farm in the country, adding up to a total of 40 years' of conventions.

While he was not working on the farm, Paul dedicated his time to benefiting the community he called home. Active in his community, he was a member of St. John's United Church Christ in Fostoria; the Seneca County Farm Bureau; the State and National Ayrshire Associations; the National Dairy Shrine; and both the State and National level of the Loudon Center Grange. Paul helped each of his four children earn their 4-H club 10-year pins in Seneca County, and he enjoyed working with them on their county fair projects and yearly showcases at the Ohio State Fair. Paul loved farming, dairying and bowling, but most of all, his family.

This week—on what would have been Mr. Rinebold's 76th birthday—I would like to honor him for his dedication, service to our country, and contributions to the Ohio dairy community and his friends and neighbors in Fostoria community. I would also extend my thoughts and condolences to his family—his wife Ardith, sons Jeffrey and Michael, daughters Cheryl Ann and Paula, eight grandchildren, Brian, A.J., Jackson, Brittany, Brayden, Blake, Taylor, and Cameron, and two great-grandchildren, Anistyn and Chase, on their loss.

Emerson wrote "To know one life has breathed easier because you have lived, that is to have succeeded." We have all breathed easier because of Paul.●

#### USF HEALTH BYRD ALZHEIMER'S INSTITUTE

● Mr. NELSON. Mr. President, we need to find a cure for the devastating disease of Alzheimer's. According to the Alzheimer's Association, there are 5 million people living with Alzheimer's in America today. Last year alone, \$213 billion was spent on Alzheimer's care in the United States. And if measures are not taken to address the issue, it is estimated this will rise to \$1 trillion a year by midcentury.

As the senior Senator from Florida and the chairman of the Special Committee on Aging, I am well aware of the toll this disease takes on individuals and their families. In 2010, about 450,000 Floridians were living with this disease, but this number is expected to rise to 590,000 by the year 2025.

Florida is the home of groundbreaking research in the field of treating, and hopefully curing, Alzheimer's. Today I will focus on just one

of Florida's many research institutes, the University of South Florida, USF, Health Byrd Alzheimer's Institute. A leader in the field, the Byrd Institute is already implementing and routinely practicing key tenets outlined in the milestones of the Federal Government's 2013 National Alzheimer's Plan, including prevention, memory impairment screening, state-of-the-art diagnosis and treatment, supportive services, and education.

As a university-affiliated free-standing Alzheimer's center, the Byrd Institute is one of very few places that can offer high-quality, integrated Alzheimer's care. In fact, USF Magazine boasts that it is "the largest facility of its kind in the world." The Byrd Institute's streamlined approach emphasizes integrated Alzheimer's care among physicians, researchers, therapists, social workers, support groups, caregivers, and other entities that play a crucial role in the comprehensive well-being of Alzheimer's patients. As an active Alzheimer's research site, patients have access to many publicly and privately funded clinical trials. Research productivity at the Byrd Institute has been brisk with \$2.7 million in Federal grant expenditures for basic and translational research from 17 new and continuing Federal grants in 2012 and 2013. The Alzheimer's Association, along with several other non-Federal sponsors, provided nearly \$1 million in funding to the center.

The institute's strong track record as a regional trailblazer in Alzheimer's care demonstrates the vast potential for the expansion of similar types of care centers on a national level. Moving forward, the Byrd Institute offers hope for accelerated and improved Alzheimer's care. It is a living and breathing testament to what can be accomplished by working together to tackle a problem that affects us all and a true model for the future of Alzheimer's care in this Nation.

I know that many Floridians—as well as advocates from all across the Nation—are visiting with their congressional representatives to urge greater funding for research funding at the National Institutes of Health and caregiver support from the Administration for Community Living. I want all Floridians visiting, as well as all of those who couldn't be here today, to know that I share their commitment for finding a cure for this dreaded disease.●

#### FAIRFIELD EAGLES

● Mr. TESTER. Mr. President, I wish to honor the Montana Class B Girls Basketball State Champions: the Fairfield Eagles.

In rural Montana, high school basketball is a way of life. Rural towns take pride in their teams' success, and fans often travel hours across the State to see their children, their grandchildren, or their neighbors play. Fairfield, MT, is no exception.

This year, the Eagles won their fourth consecutive State championship
